15 February 2025

To All Bryden Country School Parents, Alumni, Chegutu Community and Concerned citizens

Please sign this **petition in OBJECTION to the:**
proposed Cement Factory and Brick moulding plant on one side of Bryden Country School (Plot 8 Eastbourne) and on the other side of Bryden Country School, (Lambourne Estate) proposed expansion of the Limestone Quarry mine. Land is already being cleared.

The objection is based on the following-

1. Proximity to the school of both sites – wedging the school between two industrial zones.
2. Health risks to all children and staff – possibility of eye, and skin irritation as well as respiratory challenges both short and long term.
3. The knock-on effect on enrolment with Bryden Country School losing its “country school” standing if it has a cement factory on one boundary and an active limestone quarry mine on the other.
4. Noise pollution from extended blasting, mining activities, heavy vehicles and machinery.
5. General dust as well as exposure to cement and quarry dust.
6. Contamination of surrounding groundwater, dam on Lambourne farm, smaller waterways and pools and through runoff into Mupfure River
7. Degradation of the environment.
